Lecture Reflection: L12

Course: IT Project Management (BIT)

Date: Tuesday – 11/11/2025

Topic: Entity Relationship Diagrams (ERDs)

Instructor: Dr. Ahmad Kheraisat

Student: Dareen Qutishat (0221733)

This lecture introduced ERDs as a fundamental visual tool for designing complex database systems.

I learned how to identify entities, attributes, and relationships within a business system.

The session clarified the process of transforming these visual models into actual database tables.
