Lecture Reflection: L21

Course: IT Project Management (BIT)

Date: Tuesday – 09/12/2025

Topic: AI in Project Management

Instructor: Dr. Ahmad Kheraisat

Student: Dareen Qutishat (0221733)

This lecture introduced the various applications of Artificial Intelligence within modern project management.

I learned how automation and predictive analytics can be used to enhance managerial decision-making.

As a BIT student, understanding AI integration is vital for managing the future of project environments
